DETAILED ACTION

Allowable Subject Matter

1. Claims 1-26 are allowed.
2. The following is an examiner's statement of reasons for allowance: None of the cited prior art teaches a jitter measuring apparatus or method that includes converting a signal to be measured into two orthogonal signals; calculating an instantaneous phase based on the two orthogonal signals within a range between a lower limit phase value and an upper limit value; detecting a differential value of the instantaneous phase, correcting the differential value and outputting a corrected differential value of the instantaneous phase when the differential value detected is over the range dependent on the lower limit phase value and the upper limit phase value; eliminating an offset component included in the corrected differential value; and determining a jitter amount of the signal by integrating the differential value which is output, as shown in claims 1 and 14. Further, as pointed out by Applicant in the reply received 20 September 2006, claims 1-13 define an apparatus that is not descriptive material per se.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel L. Barbee whose telephone number is 571-272-2212. The examiner can normally be reached on Monday-Friday from 9-5:30.
